

Areas of Expertise

Managing critical deadlines or shifting priorities and leveraging reliable delivery are a definitive strength of my 20+ years of experience. Detail orientated, passionately accurate with solid exposure to technologies principally within the design, *advanced UI* and illustrative environments including mapping, earth sciences, typography and, iconography. I am extremely fluent with current design software and systems administration including a variety of CMS infrastructures. Very easy to work with in a team environment, and a solid foundation in content development, style guidelines, design infrastructures and frameworks.

- "Hand-coding" web technologies which include XHTML, CSS, PHP, OOP (AS 2-3), JQuery, and JavaScript.
- User Interface development experience in cataloging and content inventory management (CIM/CMS).
- Navigational architectures, responsive design, comprehensive labeling, scalability issues, GUI etc.
- Experienced in developing core business strategy solutions in regards to Internet technology.
- In depth knowledge of search engine optimization (SEO) principles, Google mapping API, web standards, cross browser deviations, wire frame development and prototyping (version control).
- 20+ years experience in technical illustration and graphic design including video and animation.
- Studio Tools/Equipment: Computer 64bit OS Windows 7 & LINUX OS variants, Scanner, Monitors 42"- 52" dual 28", Adobe CS, MS, COREL, and creative software (PC based).
- Server software and FTP Hosting setup repository for client and team pairing, SKYPE, remote.
- Extensive and developed knowledge of computer software and hardware.
- Extremely conversant in file type, directory structures, data archiving and compression.
- Administrative and technical expertise in design and implementation of systems.
- Design background in Environmental, Geological, Geophysical and Earth sciences, mapping & cartography.

An excellent addition to any design team I have the ability to adapt and respond to developing technologies with overwhelming expertise. More information? Please feel free to contact me for a "chat" at (403) 719-4057 or via e-mail at cam@aull.com and review my work "online" at www.aull.com.

Sincerely,
Cameron Aull

Technical Skills

- Programming:** HTML (5), XHTML, CSS, Actionscript 2.0 - 3.0 (OOP), JQuery/MooTools frameworks, GOOGLE API's - Principles of PHP, JavaScript, XML, Client and Server side performance Optimization (Gzip)
- Applications:** Adobe Suite CS6 - Photoshop, Illustrator, Dreamweaver, Homesite, Corel Draw Design Suite 5, Macromedia Flash 8 - Animation, MS Office Suite, AutoCAD, Intergraph, Camtasia Video / screen recording, WordPress
- Administration:** Apache HTTP Web Server, PHP 5.0, and FTP, "Dev" Repositories, Remote (SKYPE) video and teleconferencing - System Administration
- Computer Management:** All hardware and software, Networking, WIFI and remote development
- Familiar with OS platforms and administrative functionality
 - Network drives, systems administration, repositories, and associated issues.
 - Install memory, software applications, drivers, and printers replacement migrations by installing new keyboard, mouse, docking stations, power supplies and run cabling.
 - Follow procedures with little to no immediate supervision.
 - Repository, R&D, QA set-up for remote administration/development.
- Operating Systems:** MS DOS, Windows 3.0 to Window 7, LINUX and MAC (but not much)

Experienced in:

- User Interface development with experience in cataloging and content inventory management.
- Technical development and design - UI, Architecture, scalability and responsiveness.
- Design and coding of navigational architectures, comprehensive labeling, scalability, O/S issues, GUI and file repository systems.
- Technical illustration and graphic design including animation, video and iconography.
- Developing core business technology strategy solutions.
- Extremely broad and developed knowledge of computer software and hardware.
- Industry standards and applications of mechanical and reproduction processes.
- File type, directory structures, data archiving and compression.
- Administrative support / technical expertise in design and implementation of computer systems.

Development & Design History

Cameron Aull, (Consultant Web -U.I., U.X. / Graphic & Technical Design)

<http://www.aull.com>

Calgary Alberta, Canada (1992 – Current)

Independent developer in technical and graphic design. Specializing in Technical illustration and U.I. development for the Internet. Custom design of motion graphics and interfaces design including QR codes, Interactive mapping, Brand development, Mobile UI and SEO. Analytic for GOOGLE Ad words and applications. UI Development - Mapping, Print design, Web UI and some software UI development. Clients have included, but not limited to:

- Trans Canada Utilities (FLASH UI Lead)
- Petro Canada
- INTEL (Folsom California)
- Sybase (San Francisco - Bay Area)
- Yahoo (indirectly-R&D consultant)
- Macromedia (R&D consultant)
- Canterra Energy
- Mark Resources
- Shell Resources (Canada)
- Start-up dot.com organizations (Canada and the US)

TransCanada Utilities, (Consultant FLASH / Graphic Programmer)

http://www.transcanada.com/tollcalculator/tollcalculator_tool.html

Calgary Alberta, Canada (October 2007 – February 2008) (June - July 2013) (September - November 2014)
